

SUCTION-BOOST™ | MULTIPLE USE STICKY PAD

SP100

Patent Pending

Suction-Boost is a thin, clear, double-sided adhesive pad that sticks to most solid surfaces, including glass. It provides an improved mounting surface for securing suction cup based items and other non-permanent items in any environment.

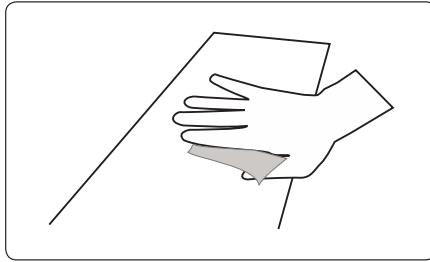

Features include:

- Simple to use and easily installs in seconds
- Sticks to hard, semi-smooth, and contoured surfaces
- Does not leave marks on surface or device
- Washes with soap and water to rejuvenate stickiness
- Can be used in many different ways in the car, home, office, etc. Its uses are endless.

INSTRUCTIONS FOR USE

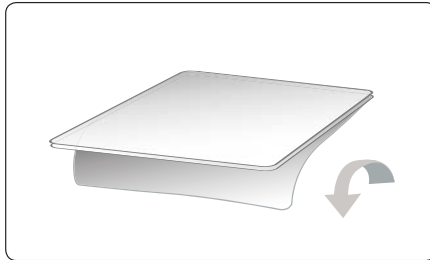

1. PREPARE THE SURFACE

Clean the interior windshield, dash, or other mounting surface with an alcohol pad. Let the surface dry completely.

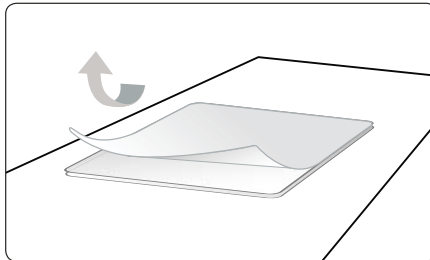

2. PEEL OFF BOTTOM COVER

Carefully peel off the protective cover on one side of the pad. Firmly place in desired location.

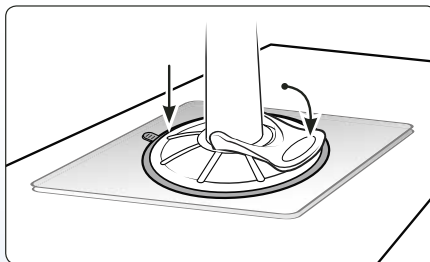

3. PEEL OFF TOP COVER

Once affixed, carefully peel off the protective cover on the other side of the pad.

4. STICK ITEM ON THE PAD

Attach your item (windshield suction pedestal, object in the home, etc.) to the sticky pad to secure. The adhesive surfaces of the pad will remain very tacky during normal use.

USE ON WINDSHIELD

USE ON DASHBOARD

USE ON DESKTOP
