

Deluxe Multi-Angle Windshield Mounting Kit for PSP

Support Universel De Téléphone Cellulaire Portable
Universelle Handy-Halterung
Soporte Universal Para Teléfono Celular
 通用手機插座

The Deluxe Multi-Angle Mounting Kit for the Sony PSP has two solutions for your PSP; The windshield or the dash / console in your vehicle. No other solution provides as much diversity for mounting your PSP in the car.

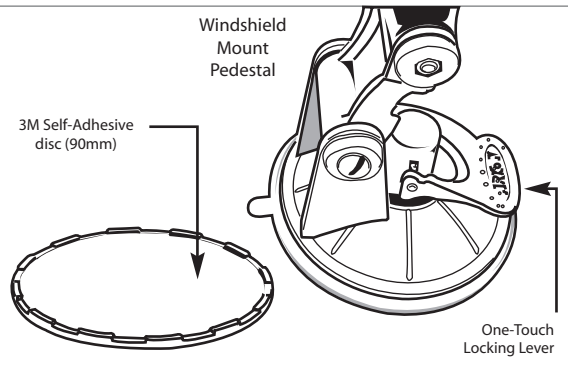

Windshield Mount Installation

1. Select a location in the vehicle to install the windshield suction-cup pedestal. Do not mount over airbag cover panel / deployment zone.
2. Use the enclosed alcohol pad to clean and prep the windshield mounting surface.
3. Firmly press the suction cup against the windshield. Secure the suction cup connection by flipping down the one-touch lever.
4. Adjust the tightening knobs on the pedestal for the ideal position.
5. Insert the PSP-cradle's female dual T-grooves into the male T-grooves.
6. Place the Sony PSP unit into the spring-loaded support legs first, then push it inward into the top-placement clip to secure the unit into the cradle.

Dash or Console Mount Installation

1. Use the enclosed alcohol pad to clean and prep the console or dash surface of residual oil.
2. Peel the backing to expose the adhesive surface and press down firmly.
3. Allow the disc to bond at room temperature (approximately 72°F), and wait 24 hours prior to use so it is firmly attached.
4. Firmly press the suction cup against the circular disc. Lock the suction cup connection by flipping down the one-touch lever.

Package Contents

- PSP Cradle
- Windshield Mount Pedestal
- Console / Dash Adhesive Disc
- Alcohol Pad
